

10

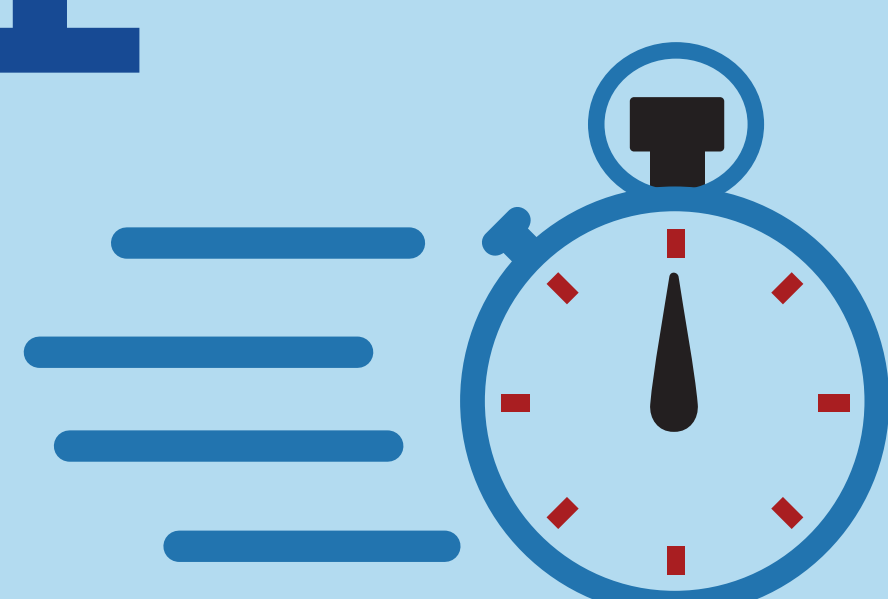

GOOD REASONS TO CHOOSE NETAPP AFF

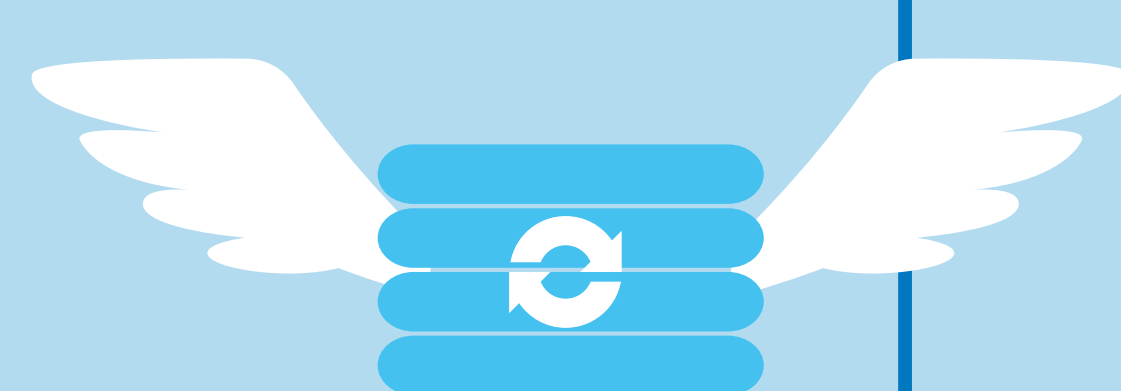

FAST APPLICATIONS

Accelerate applications with the fastest unified scale-out all-flash array of up to 7M IOPS at submillisecond latency and over 360PB effective capacity.

01

02

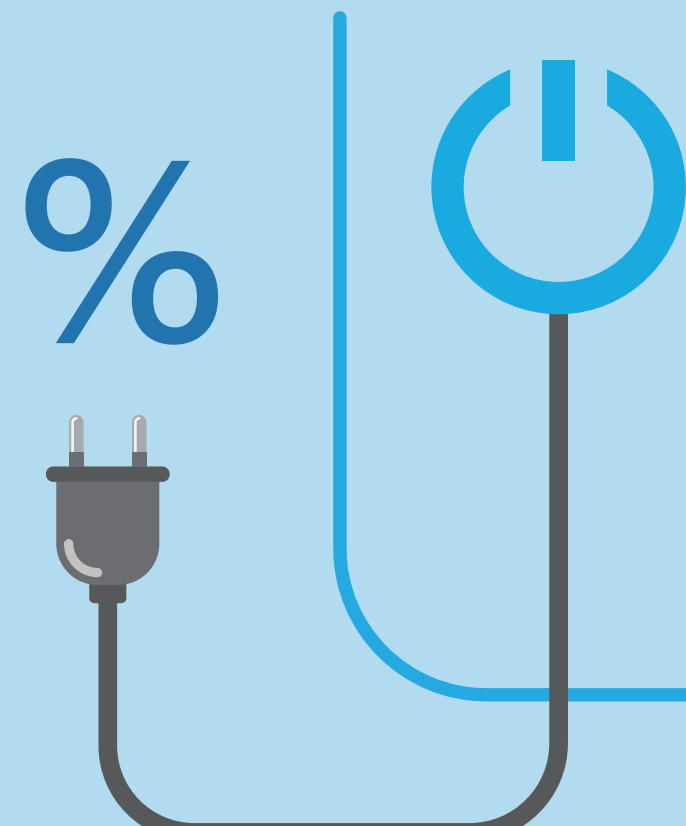

TRANSFORM DATACENTRE

Best-in-class flash density: a complete flash system of 1PB in a 4U compact enclosure

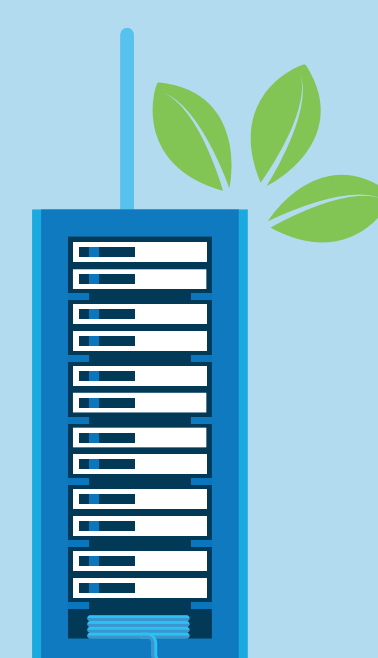

REDUCE POWER

Reduce power use by 11 times and rack space by 19 times and cut support costs by 67%.

03

04

GO GREEN

Businesses are 'greener' with up to 95% reduction in space, power and cooling.

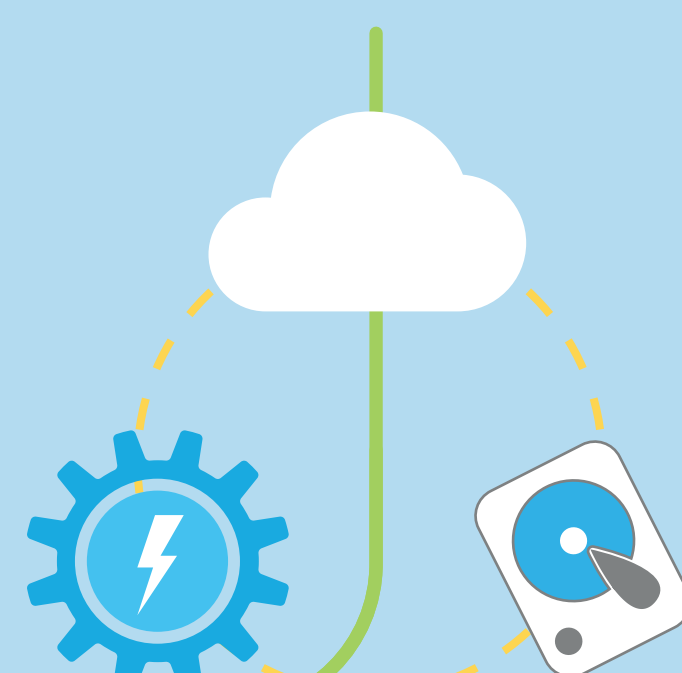

SCALABILITY

FlexGroup – a massively scalable, high-performance NAS container for the latest generation of applications in the EDA, high-tech, oil and gas, and media and entertainment industries. It scales a single container up to 20PB and 400 billion files.

05

06

UNIFY DATA MANAGEMENT

Unify data management for both SAN and NAS environments, from flash to disk to cloud.

ONTAP SOFTWARE

AFF systems speed up your business without compromising on the efficiency, reliability, or flexibility of your IT operations.

07

08

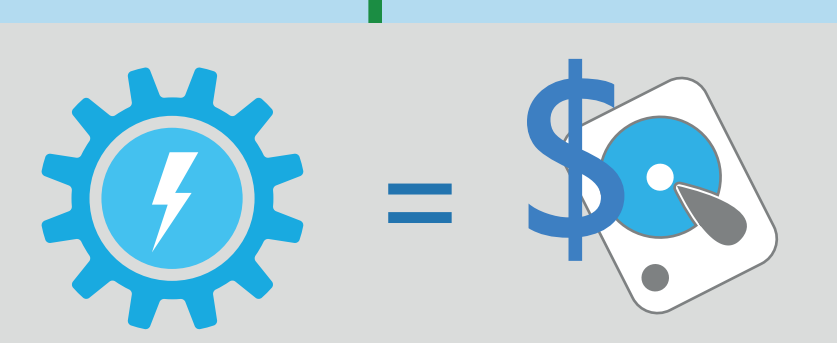

REDUCE SSD STORAGE

Reduce SSD storage by 5 to 10 times on average with inline data reduction technologies.

FLASH FOR COST OF DISK

You can get flash at the cost of HDDs, thanks to NetApp data reduction technologies, enhanced with new inline data compaction.

09

10

AWARD WINNING

The only all-flash system to support seamless data management across flash, disk and cloud resources.
